

MANAGE

Ivanti Neurons for Healing

Short Description

Diagnose and remediate issues quickly and proactively using automation-powered bots.

Medium Description

Automation-powered bots proactively detect, diagnose, and auto-remediate configuration drift, performance, and security issues, and maintain compliance for endpoints. Automation of routine tasks paves the way to creating a truly self-healing environment.

Product	Description	SKU
Ivanti Neurons for Healing	Automation-powered bots to proactively diagnose and remediate issues quickly	TBD

What Does it Do?

- Autonomously self-heals endpoints and edge devices
- Detects and resolves issues before they become problems
- Auto-remediates configuration drift, performance, and security issues

What are the Target Business Outcomes?

- Optimize device performance, health and security
- Speed issue resolution and free up IT to focus on more innovation.
- Reduce time, costs, and improve the user experience
